EDUCATION

DR. D.Y. PATIL INSTITUTE OF TECHNOLOGY, PIMPRI Maharashtra,India
Bachelor of Engineering(Computer Engineering) [CGPA - 8.8] *June 2024 - August 2028*

PROJECTS

Uniflow (Role - Backend Blockchain Engineer) *Link* *Demo* *Feb 2026*

- Built a cross-chain payroll system enabling single USDC deposits with automated multi-chain salary distribution.
- Integrated Circle Developer-Controlled Wallets and CCTP for secure custody and cross-chain settlement.
- Developed backend services for treasury management, reconciliation, and automated payouts using event-driven architecture.

Reconciliation Engine – Financial Transaction Processing System(FullStack Engineer) *Link* *Demo* *JAN - FEB 2026*

- Built a microservice-based reconciliation engine using Kafka for asynchronous event processing.
- Implemented transaction state management with durable persistence using PostgreSQL and Prisma.
- Developed fault-tolerant consumers with retry handling and deterministic matching to reconcile transaction records.

DealForge (Role - Full-Stack Blockchain Engineer) - Won 2nd prize EigenCompute *Link* *Mar 2026*

- Built a trustless AI-agent marketplace where agents autonomously negotiate, escrow funds, and settle deals entirely on-chain.
- Implemented LLM-powered autonomous negotiation using Venice AI/Gemini, enabling agents to evaluate proposals and generate counter-offers.
- Built decentralized work verification using EigenCloud TEEs, with EIP-712 cryptographic identity for passwordless authentication.

Memed.fun (1st Prize, Lens Protocol Hackathon, Role - Frontend Engineer) *Link* *Demo* *May 2025*

- Built frontend for a Lens-based meme token platform integrating smart contracts and on-chain interactions.
- Implemented wallet connection, transaction flows, and dynamic state updates using Next.js.
- Contributed to project that won 1st Prize at Lens Protocol Hackathon.

1Node – Multi-Chain No-Code DeFi Automation Platform (Role - Frontend Engineer) *Demo* *Jul 2025*

- Built frontend for a Lens-based meme token platform integrating smart contracts and on-chain interactions.
- Implemented wallet connection, transaction flows, and dynamic state updates using Next.js.
- Contributed to project that won 1st Prize at Lens Protocol Hackathon.
- Won Prize worth $20,000

ACHIEVEMENTS & CERTIFICATES

- 1st Prize Winner ($20,000) – Lens Protocol Hackathon for building Memed.fun, a decentralized meme-token platform.
- 2nd place Eigencompute - Synthesis.md
- ETHGlobal Selfie Check Track Winner ($1,166.67) — Won the World ID-sponsored track for ArcAsset.

SKILLS & INTERESTS

Data Structures & Algorithms: Arrays, Hash Maps, Trees, Graphs, Dynamic Programming, Greedy, Binary Search
Frontend: React.js, Next.js, Tailwind CSS, Redux (State management)
Language: TypeScript,JavaScript,Python, Solidity, Java, SQL
Backend & Systems: Node.js, Express.js, PostgreSQL, Kafka, Microservices Architecture
DevOps & Tools: Docker, Git, Postman, Foundry,AWS, kubernetes, argocd, grafana
